

TANQAY

¿WHO WE ARE?

We are a NGO focus on improving rural population life quality in a sustainable way, through different projects created from the use of technology and thought to support initiatives of climate change and environmental protection.

HOW WE ACHIEVE IT?

01

We identify a specific need from a specific rural community, and then make a first social and administrative **information gathering** (legal incorporation) and from their economic/environmental resources.

02

With this information we make a **Project Profile** which indicates the technical scoop of the future project to be held, as well as the different milestones, time and economic or human resources needed for the Project Execution.

03

We make a **constant monitoring** to the KPIs predefined on the Project Profile.

OUR MISION

With rural communities: To promote and develop activities in favor of vulnerable communities' welfare, by improving their life conditions through the execution of sustainable productive projects.

Within the environment: To be an active part in the reduction and mitigation of carbon emissions; by developing and implementing projects of Energy Efficiency and Forestry.

OUR VISION

To be a recognized institution in the implementation of new technologies to achieve greater efficiency in productive activities at rural communities, keeping full harmony with our natural resources.

OUR VALUES

EMPHATY

RESPONSABILITY

TRANSPARENCY

HARMONY

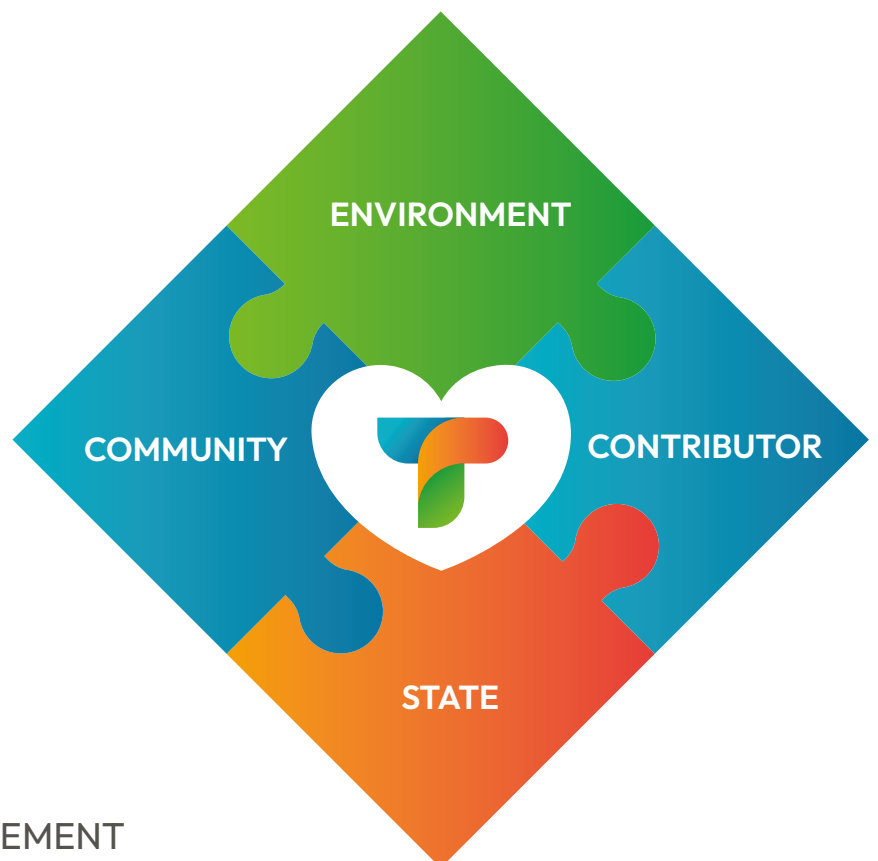

HUMANITY

RESPECT

CONTINUOUS IMPROVEMENT

1 IMPROVED COOKING STOVES WITH CARBON CREDITS RAISING.

Objective: To improve the life quality of the most vulnerable communities, by promoting the proper and sustainable use of natural resources.

2 APPLICATION OF SUPER ABSORBENT POLYMER IN AGRICULTURE.

Objective: To improve the availability of limited water resources in rural communities.

OUR PROJECTS

3 IMPROVEMENT OF COFFEE AND COCOA PRODUCTION CAPABILITIES.

Objective: To increase the production levels of coffee and cocoa crops.

4 SUPPORT IN THE FORMALIZATION OF RURAL LANDS.

Objective: To participate in the improvement of farmers' life quality, as well as in the agricultural activities.

MORE PROJECTS

5 SUSTAINABLE FOREST MANAGEMENT IN WATER SUPPLY BASINS.
Components: reforestation, conservation of wetlands, water collection and availability and productive projects.

6 ENHANCEMENT OF TRADITIONAL MEDICINE IN NATIVE COMMUNITIES.
Objective: To provide with productive alternatives that helps the conservation of nature.

HOW TO SUPPORT US

VOLUNTARY DONATION

We receive all donations from private or public institutions or from people who wish to participate in a future social or environmental project that we developed (we coordinate the Action Axes with this entity to where they want their donation participate).

DONATION FOR A SPECIFIC PROJECT

We work hand in hand with any private or public entity, who wants us to develop a specific project in their area of influence.
